

ConcenTrace Trace Mineral Drops

It is also one of the most powerful natural health concentrated mineral supplements in the world and has many uses and applications.

It's impossible to underestimate the importance of minerals and trace minerals for the human body.

They are the catalysts for all the vitamins and other nutrients your body uses for developing and maintaining good health.

ConcenTrace® captures the perfect balance of trace minerals your body needs.

Using ConcenTrace® every day may help maintain healthy energy levels in your body by providing your body's entire electrical system the minerals it needs to function properly.

ConcenTrace® Trace Mineral Drops is an all natural mineral concentrate that's made by using ConcenFlo™, our proprietary harvesting process. ConcenTrace® contains over 72 naturally occurring ionic trace minerals from the Great Salt Lake with 99% sodium removed.

Ideally, minerals should come from eating a raw food diet, however, even eating a raw food diet isn't enough since researchers have proven that soils have been depleted of minerals, therefore, if it's not in the soil, it's not in the food.

Here's where ConcenTrace® comes in, taking ConcenTrace® every day ensures you're getting a full spectrum of ionic trace minerals, which are the same kind of bio-available ionic trace minerals that are found in foods!

How do you make ConcenTrace® ConcenTrace® isn't actually something we make.

It's an amazing complex of over 72 ionic trace minerals that has been made by Mother Nature. For thousands of years, every sprouting seed and towering tree has helped dissolve minerals, raising them from deep within the soil to the surface, where they are easily washed away, but they don't just wash away. They are carried in the rivers and streams into oceans and seas like the Great Salt Lake (GSL) in Utah, USA.

But the GSL is unique because it has no outlets and is considered an inland sea. Therefore, the GSL is rich in minerals that have been deposited there over these thousands of years.

At Trace Minerals Research, we simply harvest the minerals from the pristine shores of the GSL at our state-of-the-art mineral harvesting facility.

This facility was designed by certified chemical engineer David S. Butts, one of the world's foremost experts in the field of solar evaporation technology.

Why is ConcenTrace® so powerful? ConcenTrace® contains a full spectrum of all the minerals in a balance natural to the body.

Once harvested from the GSL, we use a completely natural concentration process without the use of chemicals or dyes that removes the sodium from the GSL water.

We use solar evaporation technology to concentrate the water, which really means that all we use is natural sunshine! The result of this natural process is ConcenTrace®, an all natural ionic trace mineral blend that is 26 times more concentrated than colloidal trace minerals, making it one of the most naturally powerful health supplements on the market.

In addition, all of our facilities are FDA cGMP certified (Good Manufacturing Practices) through the Natural Products Association. GMP certification shows our customers, retailers and international buyers that we are committed to producing safe products of high quality.

Halal Certified-ConcenTrace® has been reviewed and certified Halal by the Islamic Food and Nutrition Council of America (IFANCA).

Kosher Certified-ConcenTrace® has also been certified Kosher by the Rabbinical Council of California (RCC).

Certified Vegan-the American Vegetarian Association has certified that ConcenTrace® is approved for vegan status.

Your Body Needs ConcenTrace® Your body is an intricate circuit board of electric charges and impulses. In order for it to stay balanced and perform at optimum efficiency, you need to constantly replenish yourself with the minerals and trace elements found in ConcenTrace®.

The solution is in precisely the same proportion as healthy human fluids without synthetically produced compounds or deadly heavy metals.

The ionic minerals in ConcenTrace® also have the power to maintain and even improve the pH balance in your body.

It's important to keep your body's acid base balance because an acidic body is a breeding ground for disease.

ConcenTrace® is so essential to human health that you'll find it in every one of our quality products. ConcenTrace® is the perfect way to replenish your body with all the elements you need to plug in and recharge.

SUGGESTED USE

This product is all natural, highly concentrated, contains no added preservatives, flavours, or sweeteners and has a very strong taste.

We recommend mixing it with juice or food and dividing the serving throughout the day to mask the concentrated mineral flavour.

Begin regime by taking 10 drops for 3 consecutive days. Each day thereafter, increase serving by 10 drops up to ½ teaspoon (40 drops) once or twice daily.
